Lokalizacja:

The apartment is located in a unique building - a historic mill converted into a residential building in 2010. Thanks to this coincidence, the first real lofts in Krakow were created. The developer has preserved many historic elements, such as over 100-year-old exposed brick and original wooden beams, which, combined with a new substance referring to the original character of the building, gives it authenticity.

The "Lofty w Młynie" investment is located in an extremely popular part of Krakow. Zabłocie is a modern and developing district, located on the Vistula River, close to the historic Kazimierz and Podgórze, which is experiencing a renaissance. Thanks to its location, it offers residents everything they need for a comfortable life.

The building itself is very well-kept and located on a quiet, cul-de-sac. For the safety and convenience of residents, the building is guarded and monitored, has a 24-hour reception, silent elevators and an underground garage, as well as external parking spaces in front of the front facade. Another great advantage is the green terrace available to residents on the entire roof of the building. From it you can admire not only the panorama of the city, but
